## **FOREWORD**

This Annual Development Plan (ADP) has been prepared according to Section 126 of the PFMA, 2012 and Article 220(2) of the constitution. This is the second Annual Development Plan in a series of five Annual Development Plans to be implemented during the County Integrated Development Plan (CIDP) 2023-2027 plan period.

Building on the successes and lessons learnt from the previous plan period, priority programmes and projects captured in this plan have therefore, been carefully designed to build on the gains made from implementing the preceding ADPs under the previous CIDP 2018-2022 period. In particular, increasing the pace of socio-economic transformation through strategic emphasis on economic, social, environmental, spatial, legal and institutional aspects of development is well outlined.

In implementing the Annual Development Plan, the county is effectively integrating the global Agenda 2030 on Sustainable Development Goals (SDGs), Africa's Agenda 2063 and the fourth Medium Term Plan of the Kenya vision 2030. The ADP provides the basis for implementing the CIDP, Medium Term Expenditure Framework (MTEF) and Sectoral Plans while guiding resource allocation to priority projects and programs.

Preparation of this Annual Development Plan for FY 2024/25 was done against the background of economic resilience and growth of 6.0 % which is expected to be maintained in the medium term. This growth outlook will be supported by a broad-based private sector growth, strong performance of the services sector and recoveries in agriculture, while the public sector consolidates. In the Sub-Saharan African region, growth is projected to decline slightly from 3.9 % in 2022 to 3.5 % in 2023 before rebounding to 4.1% in 2024.

The country's inflation is expected to be maintained within the target range of +\_2.5% of 5%. Interest and exchange rates are expected to remain stable, and this will be safeguarded over the medium term.

Given the limited resources that the economy is likely to generate under the prevailing circumstances, County Departments and Agencies are required to ensure that priorities are accommodated within the resource envelope and ensure that the focus is on the implementation of the strategic priorities outlined in the CIDP.

Under this plan, transformation of the County economy is pegged on enhanced inclusiveness towards an equitable society through working towards food security, diversification and commercialization of agriculture, infrastructure development, decent and affordable housing, wider access to national, regional and global markets for our products, entrepreneurship and job creation, improved access to quality education and training, Strengthening the linkage between skills and industry, functional health system in terms of service availability, readiness and enhanced capacity to offer health services, functionality of improved water sources and sanitation, driving green growth and climate change management.

The plan outlines among others: the strategic priorities for the medium term; county programs and projects to be delivered; measurable indicators of performance and the budget allocated to the programs and projects.

The county will collaborate with local stakeholders, private sector investors, other Counties, the National Government and development partners in delivering these outcomes. In doing so, the county will progressively achieve the targets of the sustainable development goals.

Through this Annual Development Plan for 2024/25, the need for sustaining of momentum for implementation of the second extract of the third CIDP 2023-27 cannot be gainsaid to achieve the desired acceleration of socioeconomic transformation to a more competitive, inclusive, and resilient county economy.

## **ACKNOWLEDGEMENT**

This Annual Development Plan is prepared in accordance with section 126 of the public finance management Act, 2012. It serves as a basis for development of the County annual budget and guides the budget making process for the next financial year 2024/2025.

I wish to express my sincere gratitude to H.E the Governor for his leadership and support in the development of this Plan. Special recognition goes to the County Executive Committee Members, Chief Officers and the various directors who provided leadership and necessary information required in this Plan..

Special thanks go to members of the technical economic planning team and PFM officers for their dedication in the preparation of this Plan. Their commitment and tireless effort ensured that this document was produced in time.

Our partners, members of the public, CBEF and Civil Society Organizations are appreciated for their effort and contribution. I wish to sincerely thank and acknowledge all individuals who collectively and individually contributed towards the preparation of the plan.

On the basis of this Annual Development Plan, prosperity for everyone will be achieved. God Bless you all.

## **EXECUTIVE SUMMARY**

The Annual Development Plan is prepared in accordance with section 126 of the public finance management Act, 2012. It is the first document to be prepared as per the County Budget Calendar to guide the annual budgeting process.

This Plan comprises the second-year extract of the five-year County Integrated Development Plan (CIDP III 2023-22027). The ADP serves as a basis for development of the county annual budget and guides the budget making process for the next financial year 2024/25, thus serving as a mini budget that is produced earlier in the budget making process.

In accordance to Article 220(2) of the Constitution, every county government prepares a development plan that includes –

- a) Strategic priorities for the medium term that reflect the county government's priorities and plans;
- b) A description of how the county government is responding to changes in the financial and economic environment;
- c) Programmes to be delivered with details for each programme including: the strategic priorities to which the programme will contribute; the services or goods to be provided; measurable indicators of performance where feasible; and the budget allocated to the programme;
- d) Payments to be made on behalf of the county government, including details of any grants, benefits and subsidies that are to be paid;
- e) A description of significant capital developments;
- f) A detailed description of proposals with respect to the development of physical, intellectual, human and other resources of the county, including measurable indicators where those are feasible;
- g) A summary budget in the format required by regulations; and
- h) Such other matters as may be required by the Constitution or this Act.

Over the review period the County made outstanding milestones including; Farm input program where 500 farmers were beneficiaries of planting, topdressing and certified maize seed per ward, Distributed 344M and 180M as scholarship and bursary to 12,727 beneficiaries, Construction of a 300 bed Maternal and Child Health Ward at BCRH is 99% complete, Upgrade of server room – phase III completed, Upgrade of records management system done, MasindeMuliro Stadium renovated /Modernized(Pavilion), 23 KMs of rural Roads Opened, 14 No. Box Culverts (including drifts) Constructed, 35 boreholes drilled across the county, Refurbishment of 7 houses done and 10 acres of land bought in small portions for government projects.

During the implementation period, County Departments and Agencies encountered a number of challenges, including; Delay in fund disbursement by the exchequer, Overreliance on National Government funding to finance development projects, the absence of continuous staff capacity development, lack of legislature to support project implementation, climate change

Proposed solutions to these challenges include; Budgeting for human resource development to improve productivity and service delivery; Encouraging departments and agencies to be innovative securing programme/project funding beyond internal funding scope; The executive to prioritize peaceful co-existence, active engagement of all stakeholders, putting in place proper as well as investing in data gathering and management.

During the plan period, the various key priority areas that the county will focus on are; Comprehensive Farm input support (inputs and extension services), Development of cooperatives, Education support through bursaries and scholarships, Construction of ECDE and VTC centres, Establishment of County level 5 hospital at BCRH, Establishment of county industrial park at Sangálo, Rolling out of county Trade Loan, Construction of Kamukuywa/ Chwele, Kipsigon Musikoma modern markets, Installation of street lights, Construction of ward offices countywide, Completion and Operationalisation of High altitude training center(Hostels), Completion of masinde muliro stadium, Completion of Misikhu Brigadier road, Upgrading of key roads (Matisi- Teremi, Chwele Lwakhakha), Protection of Mt Elgon water towers, Construction of 3 dams ( Namasanda, Mt. Elgon and Nabuyole), Affordable housing units and Construction of county Administration block.

In executing its mandate, the county commits to work closely with its partners within the region and beyond, to contribute to solutions for the challenges of today. To achieve the development agenda set out in this plan, the County shall require a minimum of Kshs.28.61 billion.

The plan's structure is summarized as follows;

**Chapter one:** This section provides a short description of the county in terms of the location; size; demographic profiles; administrative and political units. It also highlights a summary of the socio-economic and infrastructural information that has a bearing on the development of the county.

**Chapter two:** This chapter provides a review of sector/ sub-sector planned activities, achievements, challenges and lesson learnt during the implementation of the ADP FY 2022/2023. The section also indicates the overall budget in the ADP versus the actual allocation and expenditures as per sector/ sub-sector.

**Chapter three:** This chapter presents sector/sub-sector strategic priorities, programmes and projects for the year. The programmes and projects envisage a green economy by mainstreaming cross-cutting issues such as climate change; environmental degradation; Disaster Risk Reduction (DRR) HIV/AIDs; Gender, Youth and Persons with Disability (PWD); among others.

**Chapter four:** This section presents a summary of the proposed budget by programme and sector/ sub sector. It also provides a description of how the county government is responding to changes in the financial and economic environment.

**Chapter five:** This chapter discusses the county monitoring and evaluation framework as outlined in the County Integrated Monitoring and Evaluation System (CIMES).

## CONCEPTS AND TERMINOLOGIES

**Baseline:** Baseline is an analysis describing the initial state of an indicator before the start of a project/programme, against which progress can be assessed or comparisons made.

**Bottom-up Economic Transformation Agenda:** It is an economic model which aims at economic turnaround and uplifting the lives and livelihoods of those at the bottom of the pyramid.

**Green Economy:** The green economy is defined as an economy that results in improved human wellbeing and social equity, while significantly reducing environmental risks and ecological scarcities. The policy framework for the green economy and green growth in Kenya is designed to support a globally competitive low carbon development path through promoting economic resilience and resource efficiency, sustainable management of natural resources, development of sustainable infrastructure and providing support for social inclusion. The Green Economy Strategy and Implementation Plan (GESIP) 2016 aims at guiding the National and County Governments as well as other actors to adopt development pathways with higher and more efficient growth, cleaner environment and higher productivity.

**Indicator:** An indicator is a sign of progress /change that result from your project. It measures a change in a situation or condition and confirms progress towards achievement of a specific result. It is used to measure a project impact, outcomes, outputs and inputs that are monitored during project implementation to assess progress.

**Outcome Indicator:** This is a specific, observable, and measurable characteristic or change that will represent achievement of the outcome. Outcome indicators include quantitative and qualitative measures. Examples: Enrolment rates, transition rates, mortality rates etc.

**Outcome:** Measures the intermediate results generated relative to the objective of the intervention. It describes the actual change in conditions/situation as a result of an intervention output(s) such as changed practices as a result of a programme or project.

**Output:** Immediate result from conducting an activity i.e. goods and services produced.

**Performance indicator:** A measurement that evaluates the success of an organization or of a particular activity (such as projects, programmes, products and other initiatives) in which it engages.

**Programme:** It is a grouping of similar projects and/or services performed by a National/County Department to achieve a specific objective. The Programmes must be mapped to strategic objectives.

**Project:** A project is a set of coordinated activities implemented to meet specific objectives within defined time, cost and performance parameters. Projects aimed at achieving a common goal form a programme.

**Sectors:** Is a composition of departments, agencies and organizations that are grouped together according to services and products they provide. They produce or offer similar or related products and services, and share common operating characteristics.

**Target:** A target refers to planned level of an indicator achievement.

## CHAPTER ONE: INTRODUCTION

### 1.1 Overview of the County

This chapter provides an overview of the county, the rationale for preparation of ADP and preparation process of the Plan.

#### 1.1.1 Position and size

Bungoma County borders the republic of Uganda to the Northwest, Trans-Nzoia County to the North-East, Kakamega County to the East and South East, and Busia County to the West and South West. It covers an area of 3032.4 Km<sup>2</sup>. The County lies between latitude 00 28' and latitude 10 30' North of the Equator, and longitude 340 20' East and 350 15' East of the Greenwich Meridian.

#### 1.1.2 Physical features

The county covers a land area of 3032.4 km<sup>2</sup>, of which 618 km<sup>2</sup> is gazetted forest reserve (the Mt. Elgon Forest reserve), 61 km<sup>2</sup> is non-gazetted forest, and 50.7 km<sup>2</sup> is Mt. Elgon National Park. The altitude of the county ranges from 1,200m to 4,321m above sea level. The County's major physical features include Mt. Elgon; Chetambe, Sang'alo, and Kabuchai hills; the Nzoia, Kuywa, Sosio, Kibisi and Sio-Malaba/Malakisi rivers; and waterfalls like Nabuyole, Malakisi and Teremi.

The county's topography is scenic and is home to tourist attraction sites, for instance, Mount Elgon forms one of Kenya's five water towers. Wind energy can be tapped in the hills and mountain top.

However, the steep terrain in the highland areas of the county constrains infrastructural expansion. There is soil erosion during heavy rains from Mount Elgon slopes and other hilly areas. This is caused by human encroachment and poor farming practices on these fragile sites. The low-lying areas such as Bumula experience flooding from run-off from the hilly areas.

#### 1.1.4 Demographic Profiles

This section presents the County population size and its composition highlighting the specific age cohorts.

##### 1.5.1 Population Size, Composition and Distribution

Bungoma County is the second most populous county in the LREB and the fifth in Kenya. The County population was 1,670,535 as per the 2019 population census, representing 11% of the total population of the bloc. Table 4 contains population data sourced from the Kenya National Population and Housing Census Report 2019, as the base year, the current estimates, and projections for the baseline year (2022) and end (2025) of the plan period, segregated by sex.

Table 4: Population Projections by Special Age Groups

Youth (15 - 29 Years)	224,409	239,779	464,188	238,846	255,205	494,050	257,214	274,831	532,044
Reproductive Age (15 - 49 Years)	365,405	393,972	759,377	388,912	419,317	808,229	418,821	451,564	870,385
Labour Force (15-64 Years)	417,336	453,628	870,964	444,184	482,811	926,995	478,343	519,941	998,284
Aged (65+)	25,843	34,284	60,127	27,506	36,490	63,995	29,621	39,296	68,917

**Under 1:** In 2019 Housing and Population Census, the total population under one year was 40,193 comprising of 19,903 males and 20,290 females. The age cohort population is projected to increase to 46,069 in 2025. This information is important in terms of provision of health care services such as antenatal and post-natal care services in order to reduce infant mortality rates and increase immunization rate.

**Under 5:** This is the age bracket when a child is very vulnerable and requires special care in terms of food, shelter, protection both social and health. In 2019, this age cohort was estimated at total of 219,174 children and projected to grow to 251,213 in 2025. A child's best interests are of paramount importance in every matter concerning the child. This large population requires expansion of existing health facilities, establishment of more Early Childhood Development Education centers and employment of more ECDE teachers.

This is in adherence to the Kenya Constitution 2010 Article 53, put in place affirmative action programs designed to ensure that every child has a right;

- a) To a name and nationality from birth
- b) To free and compulsory basic education
- c) To basic nutrition, shelter and healthcare
- d) To be protected from abuse, neglect, harmful cultural practices, all forms of violence
- e) To parental care and protection

In consideration of the current reforms in the education sector bringing forth the Competence Based Curriculum, there was inclusion of more categories of the population projections by special age groups.

#### **Pre-school going age (below 3 years)**

The population of this age group is expected to increase from 172,148 in 2019 to 212,155 in 2025. Male children stand at 85,511 while the girls at 86,637 in 2019. Important decisions or priorities include making decisions regarding food and nutrition security for the children as well as love and safety in their homes and the day care centres.

#### **Pre-primary school age (4-5 years)**

The population of this school going group was 97,255 in 2019. The projected enrollment for the ECDE pupils between the ages of 4 and 5 years for 2023 is 96,173 and 109,105 pupils for 2027. This calls for proper planning for the needs of early childhood development (ECDE) as it provides a foundation for meeting the children's physical, intellectual, social, spiritual and emotional needs.

There is need for infrastructural development in the ECDE centres, enough teachers, introduction of school feeding programmes for nutrition and holistic development. Currently there is no provision for capitation to cater for learning materials, play equipment and training materials like crayons, chalks, stationery. There is need to finalize the ECDE policy so that the capitation programme is implemented.

**Primary school age (6-11 years)**

The population for this age group in 2019 was 147,775 and is projected to grow to 154,047 in 2027. This growth is expected to maintain the pressure on primary school facilities and the teacher pupil ratio at primary school level is not expected to change significantly.

**Secondary School Age (12-17 years)**

The population in this age group now stands at 175,566 and is expected to rise to 199,098 by 2027. Increase in population for this age group implies that the education facilities should be equipped to handle the marginal increase. This calls for continued investment in social and education infrastructure like schools, training institutions and employment creation.

**Youth (15-29 years)**

This age group had a population of 464,188 in 2019 and a projection of 548,151 in 2027. Over the medium term, the government and other development partners have initiated projects geared towards empowering the youth economically. For these initiatives to succeed, it is prudent to analyze the dynamics of this age group and how its growth rate will affect the focus and success of projects as they form part of the labour force.

The projected youth population of Bungoma County in 2022 is 509,382, 60% of whom are unemployed. This number will keep increasing as the population increases if measures are not put in place to empower them.

The county shall in adherence to the Kenya Constitution 2010 Article 55, put in place affirmative action programs designed to ensure that youth;

- a) Access relevant education and training
- b) Have opportunities to associate, be represented, and participate in political, social and economic spheres of life.
- c) Access employment
- d) Are protected from harmful cultural practices and exploitation

**Labour Force (15 – 64 years)**

This age group was 870,964 in 2019 and is projected to increase to 998,284 in 2025. This represents 52% percent of the total population. This is the economically active age group whose increase will require a commensurate increase in creation of job opportunities. Due to increase of this age group, it becomes necessary to invest in quality education and skills intensive trainings to the group to make it more productive. In order to absorb the increasing labour force, investment in diverse sectors such as modern agriculture, livestock, agribusiness, manufacturing, ICT, Transport and Infrastructure, marketing and ecotourism is required.

**Female Reproductive Age Group (15-49):**

This age cohort stood at 393,972 in 2019 and was poised to grow to 870,385 in 2025. Currently, the fertility rate for Bungoma County has reduced from 5 percent in 2009 to 3.6 percent in 2019. This trend corresponds to the national fertility rate which dropped from 4.8 in 2009 to 3.42 percent in 2019. The declining fertility rate may in the medium term induce improvements in health, education, female labour force participation and economic growth. These improvements may lead to further reductions in fertility and additional economic benefits. Further interventions should focus on healthcare to reduce the mortality rates from the current 10.2% where it has stood since 2009. Notably, the county's infant mortality rate has significantly declined from 31% in 2009 to 22% in 2019 which is encouraging.

### Aged Population (65 and above):

The number of senior citizens (those above the age of 65) stood at 60,127 in 2019. The number is projected to rise to 68,917 in 2025. This indicates the life expectancy levels are on the increase and measures should be put in place to address their varied needs; especially those associated with old age since they are no longer active economically.

The population distribution over the different cohorts remains at an average of 48% male and 52% female. This means for development to take place in the county, the county plans should integrate a gender perspective into the preparation, design, implementation, monitoring and evaluation of policies and programs with a view to promoting equality between women and men of all ages.

### Gross County Product (GCP)

Agriculture, forestry and fishing contributed the most to the Gross County Product at 44.2% in 2020, followed by Transport and Storage at 11.6% respectively. Other key economic activities include public administration and defense, education, wholesale and retail, real estate activities, manufacturing and construction. The table 6 highlights the contribution of the various economic activities in the County (KNBS, Gross County Product Reports, 2019 and 2021)

### Poverty Index

Poverty is a complex and multifaceted phenomenon that goes beyond the money metric way of measuring it. Multidimensional poverty measures a wide range of deprivations: not having enough to eat, having inadequate housing material, being sick, having limited or no formal education, having no work, and living in unsafe neighborhoods.

The multi-dimensional approach to measuring poverty was given more impetus by the 2030 Sustainable Development Goals (SDGs). Target 1.2.2 of Goal 1 on zero poverty requires all countries to measure and report poverty using all approaches and support all forms for the various age groups. The monetary poverty rate for Bungoma is 35.5% which is nearly the same as the national rate of 35.7% with approximately 525,509 people in the county being monetarily poor. Bungoma has a multidimensional poverty rate of 74.2%, which is twice the monetary poverty rate of 35.5% with a total of 1,063,914 people being multidimensionally poor.

When disaggregated by age groups, 69% of children in Bungoma are multidimensionally poor. This is 17-percentage points higher than the national average of 52.5%. Among the youths, 71% are multidimensionally poor compared to a national average of 48.1% while for the elderly population, 75% are multidimensionally poor compared to a national average of 55.7%.

Among children aged 0-17, the core drivers of multidimensional poverty are housing (84.7%), Sanitation (63%), nutrition (52%) and water (38%). For youths aged 18-34, the core drivers of multidimensional poverty are housing (82.7%), education (63.1%), sanitation (60%) and nutrition (41%). Among adults aged 35-59, the core drivers of multidimensional poverty are housing (83%), economic activity (81%), education (73%), and sanitation (63%). Among the elderly aged 60+, the core drivers of multidimensional poverty are housing (91%), nutrition (64%), sanitation (61%) and education (43.3%). Drivers of poverty have been detailed in table 7.

**Key highlights of the county's broad priorities and strategies as per the CIDP that will be implemented during the plan period.**

During this plan period, the county's broad priorities and strategies as per the CIDP will be implemented. These include:

An increase in investments in transport, ICT, and energy infrastructure in order to lower the cost of doing business and improve the county's competitiveness and productivity.

Boost job creation by expanding the manufacturing sector through establishment of an industrial park while empowering MSMEs by providing them with access to affordable credit, training and skills enhancement, tools and instruments and access to markets.

Modernising agricultural and livestock productivity will be increased to boost food security, agro processing, spur economic growth and enhance employment creation.

Further, the county will partner with the National Government in the creation of over five thousand online jobs for our youths through the Ajira Digital Programme. Our institutional framework will be strengthened to support the creative arts programs so that the industry can generate wealth and create jobs for our youth.

Access to inclusive and quality education will be prioritized to nurture a globally competitive workforce which will in turn drive economic growth and job creation. In this regard, we will provide access and a conducive learning environment to our pupils and students, expand and equip Vocational Training Centers (VTCs) institutions to improve the quality and quantity of the middle level workforce while ensuring students are competitive in the 21st century labour market.

Access to the best possible health care at the most affordable price and safe water for both domestic use and production is highly prioritized. The county vulnerable community members will be supported through the enhanced social protection and empowerment programs.

To build resilience to climate change, all programmes, projects, activities, and initiatives will be implemented while prioritizing environmental conservation and management. This will enhance sustainability of our outcomes and continued enjoyment of services delivered to our citizenry.

Policy, legal and institutional frameworks will be strengthened to form a strong foundation for participatory decision making. To measure performance, effective monitoring, evaluation, reporting and learning will be an integral part of timely implementation of planned programmes while embracing transparency and accountability.

## **1.2. Rationale for Preparation of ADP**

The County Governments Act, section 108, directs that county governments are required to prepare County Integrated Development Plans (CIDPs) that are implemented through Annual Development Plans and Medium-Term Expenditure Framework (MTEF).

As stipulated in the County Government Act (Sections 102 and 104 (1) of the County Government Act, 2012) and PFMA 2012, no public funds will be appropriated without a planning framework.

Section 126(3) of the PFMA 2012 provides for the preparation of the ADP to guide the County Budget making process for any given FY. The ADP 2023 is the second extract from the five-year CIDP III (2023-2027) and focusses on programmes, projects, and initiatives to be implemented in the FY 2024/2025.

Every county government prepares a development plan in accordance with Article 220(2) of the Constitution, that includes –

- i. Strategic priorities for the medium term that reflect the county government's priorities and plans.
- ii. Programmes and projects to be delivered with details for each programme including: the strategic priorities to which the programme will contribute; the services or goods to be provided; measurable indicators of performance where feasible; and the budget allocated to the programmes and projects.
- iii. A description of how the county government is responding to changes in the financial and economic environment.

- iv. Payments to be made on behalf of the county government, including details of any grants, benefits and subsidies that are to be paid.
- v. A description of significant capital developments.
- vi. A detailed description of proposals with respect to the development of physical, intellectual, human, and other resources of the county, including measurable indicators where those are feasible.
- vii. A summary budget in the format required by regulations; and
- viii. Such other matters as may be required by the Constitution or this Act.

### **1.2.1 The Annual Budget 2024/25**

The Annual Development Plan is the first document to be prepared as per the County Budget Calendar to guide the annual budgeting process. The annual budget for 2024/2025 will be a financing framework for programmes contained in the CIDP III 2023-2027 and ADP 2023 agreed upon by the executive and the County Assembly for implementation.

### **1.2.2 The Linkages**

Integrated development concerns all the five response areas: Economic, Social, Environmental, Legal, Spatial, and Institutional aspects of development. The ADP contributes to addressing development issues contained in these dimensions of development by having.

- ✓ Clearly defined programmes
- ✓ Implementation strategies
- ✓ Outputs and outcomes
- ✓ Targets
- ✓ Performance indicators as means of verification
- ✓ Cost estimates

All the projects presented in this ADP are extracts of the CIDP III that links its priorities and the county sectoral plans, county spatial plan, the Kenya vision 2030 through its Medium-Term Plan IV, Africa Agenda 2063, Sustainable Development Goals (SDGs) and other planning documents.

The response of the government to the needs of the people is through:

- i. Planning (policy documents, strategies, Long/Short term plans).
- ii. Legislation (Bills, Regulations, Proclamations, Contracts, legal opinions, Acts).
- iii. Appropriation (Annual Work plans and Budgets)
- iv. Service delivery and performance reviews (procurement, supply of goods/services/works, service delivery charters, National/County functions)

### **1.3. Preparation process of the Annual Development Plan**

This section outlines how the ADP was prepared detailing the process that was followed to prepare the plan. The ADP preparation process entails the following steps:

#### **Step One: Preliminaries**

At this preliminary step, the following activities were spearheaded by the County Government

Department responsible for Economic Planning;

- Development and submission of the circular by the County Executive Committee Member (CECM) responsible for economic planning on preparation of the ADP to the county Executive Committee members, all accounting officers, directors and the county Assembly. The circular clearly outlined the legal framework , timelines and guideline for the preparation of the ADP.
- Capacity Development Session for Technical officers was convened and accounting officers encouraged to adopt a participatory approach to the preparation process.

**Step Two: Data Collection and Analysis**

Information was collected on the prevailing conditions within the county and on the implementation of previous annual development plans including reviewing performance of the various sectors. It focused on the development needs of the county citizenry which are assessed to inform identification and prioritization of programmes and projects. Opportunities were identified and development challenges faced by the sector stated.

**Step three: Validation**

The ADP technical team subjected the draft ADP for validation by stakeholders, key among them the CBEF for inputs and comments.

**Step Four: Adoption and Approval**

The ADP technical team through the CEC Member responsible for Economic Planning shall present the final draft ADP to the County Executive Committee for consideration and adoption, before submission to the County Assembly for approval.

## CHAPTER TWO: REVIEW OF THE IMPLEMENTATION OF THE PREVIOUS ADP

This chapter should provide a review of sector/ sub-sector achievements, challenges encountered and lessons learnt during the implementation of the previous plan.

### Challenges, Lessons learnt and recommendations experienced during Implementation of the previous ADP

This section provides information on the challenges experienced, outlines key lessons learnt from the implementation of the previous plan and proposed recommendations for improvement. These include:

Challenges	Lessons Learnt	Recommendations
Inadequate policy and legal framework	Legal framework enables timely project implementation	Ensure appropriate legislation are in place and are aligned to the policies
Inadequate funding	Partnerships with development partners can bridge the funding gaps identified in the budgetary process	Allocation of more funds to the Agriculture sector (at least 10% of the total budget) to improve food security and livelihoods in the County.
None adherence to planned priorities	Implementation of projects outside planned targets leads to delay in achievement of desired goals	Clear focus on project priorities will mean adherence to departmental work plans and

<b>Challenges</b>	<b>Lessons Learnt</b>	<b>Recommendations</b>
		procurement plans.
Inadequate number of technical and extension officers	Innovative extension systems, e.g. e-extension, can help reach more farmers with the few extension officers in service.  There is need to fast track the staff recruitment process for replacement of officers who have exited the service	Improvement in human resource development by ensuring human capacity in ICT and technological innovations
Low level of preparedness to handle risks	Unforeseen risks greatly impact on institutional performance	Institutionalize risk management strategies
Lack of tools, equipment and motor cycles required for service delivery	Service support utilities are key components in service delivery	Adherence to work plans and procurement plans – clearing all outstanding bills within the financial year.

### Challenges, Lessons learnt and recommendations experienced during Implementation of the previous ADP

This section provides information on the challenges experienced, outlines key lessons learnt from the implementation of the previous plan and proposed recommendations for improvement. These include:

Challenges	Lessons learnt	Recommendations
Inadequate budgetary allocation	Embracing Public Private Partnership in development can reduce the financing gap.	The Department should increase its sources of revenue to avoid over reliance on exchequer releases.  Alternative financing from development partners e.g. PPP can bridge the financing gap.
Inadequate technical capacity in the Roads Department to support project implementation.	Human resource facilitates efficient delivery of services	The County Public Service Board in liaison with the Department should hire relevant technical staff and train them.
Delayed project implementation due to political uncertainty occasioned by long electioneering period	Delays in uptake of project by contracted firms leads to poor project implementation rates	Contractors should be capacity build to know that the county government is a going concern that is not affected by leadership changes
Delayed exchequer releases from the national government causing delays in project implementation.	Timely exchequer releases brings about timely project implementation	Timely exchequer releases are recommended for timely implementation of projects
Encroachment on road reserves by	Encroachment to road reserves	Land survey maps should be

<b>Challenges</b>	<b>Lessons learnt</b>	<b>Recommendations</b>
private individuals hampers project implementation.	leads to conflicts between road users and residents	accessible to all citizens
Inadequate legal frameworks for implementation of projects and programmes.	Availability of legal framework enables timely implementation of projects	Ensure appropriate legislation are in place and are aligned to the policies
Poor risk preparedness on unforeseen conditions affecting project implementation	Adverse weather conditions negatively affects quality of project outputs	Harmonize meteorological reports and procurement plans to limit adverse impacts of adverse weather conditions.

## Challenges, Lessons learnt and recommendations experienced during Implementation of the previous ADP

This section provides information on the challenges experienced, outlines key lessons learnt from the implementation of the previous plan and proposed recommendations for improvement. These include:

Challenges	Lessons learnt	Recommendations
Countywide shortage of staff and inequitable distribution of key personnel in health facilities.	Insufficient capacity of staff in terms of numbers and skills greatly affects service delivery in the department	Need for increased staffing levels in critical areas and capacity building for effective service delivery.
Rising disease burden; malaria, HIV / AIDS, diabetes, hypertension, cancers, mental health and obesity;	Poor community health strategy leads to an increase in disease burden	Need to strengthen Community Health Strategy with establishment of more community health units;
Poor health seeking behaviour compounded by high cost of health services.	Lack of awareness inhibits access to health services	Increase health education programmes, disease surveillance and screening.
Low enrolment to health insurance schemes.	Promotion of health care services increases access to health care services.	Enhance healthcare financing including promotion of health insurance coverage.
Limited funding for infrastructure development and other health delivery programmes;	Under funding of health services affects implementation of health delivery programmes	Need to develop a robust resource mobilization strategy including creating an enabling environment for collaborations and partnerships with the private sector and communities.
Lack of essential utilities in most health facilities that includes tap water, intermittent electricity, sanitation facilities that and incinerators.	Provision of essential utilities to health facilities is a key component to service delivery	Developing an integrated health infrastructure and budgeting framework is an important tool for effective health services delivery.
Absence of a robust and Integrated Health Information Management System and limited integration of ICT in health care delivery;	Health Information Management Systems is an integral tool for decision making in health care service delivery	Strengthen use of information for decision making by developing a county Integrated Health Information System.
Diminishing collaborations and partnership to support the health sector programmes.	Collaborations and partnerships helps bridge the funding gap in budgetary allocations	The sector needs to increase its revenue base especially AIA to help bridge the revenue gap.

### 2.2.5 Education Sector

The sector presents a platform for imparting much needed skills, competencies and attitude to propel the County development. In the 2022-2023 financial year, key achievements include;

- Confirmed 303 VTC instructors to permanent basis.
- Carried out quality assessment to all VTC and the report shared with the county assembly of Bungoma and TVETA authority
- Received an assortment of VTC tools and equipment from a donor in Netherlands and distributed to various VTC examination centres.
- Developed school feeding policy and pre-primary policy which are waiting cabinet approval.
- Completed the construction of 11 ECDE classrooms, 7 roofed of which 3 are being plastered, 13 have reached the ring beam level, 3 handed to the contractor and 2 projects awarded to the contractor after retendering

An analysis of planned versus allocated budget and key achievements are described below:

### Challenges, Lessons learnt and recommendations experienced during Implementation of the previous ADP

This section provides information on the challenges experienced, outlines key lessons learnt from the implementation of the previous plan and proposed recommendations for improvement. These include:

Challenges	Lessons learnt	Recommendations
------------	----------------	-----------------

<b>Challenges</b>	<b>Lessons learnt</b>	<b>Recommendations</b>
Dis integration of linkages between the annual budget and other departmental plans	Funding of unplanned projects deviates the departmental goals	Need for review of budget priorities to ensure they are in line with departmental plans
Limited funding towards education sector development programmes;	Under funding of education sector programmes affects achievement of education goals	The county departments should come up with enhanced revenue collection strategies to ensure there is no budget deficit;
High dropout rates in VTC centers	High cost of accessing vocational training leads to poor enrolment	Introduce capitation fund and bursary schemes to support trainees
Mis match between trained skills and market demand	Evolution of customer expectations has shifted demand for craft products	Continuous capacity building of tutors to equip them with emerging market skills
Inadequate training facilities and learning materials in ECDE and VTC	Poor access to training facilities affects quality of graduants	Increase investment towards education infrastructure development
Inadequate facilitation to support curriculum transition	Curriculum transition involves overhaul of both skills and infrastructure	Need to review funding to support transition requirements
Late identification of learners with special needs. The identification of learners with special needs should start at an earlier stage our ECDE teachers are not adequately equipped to do this hence need for capacity building	Learners with special needs, if identified early can be assisted and integrated in schools for normal learning.	<ul style="list-style-type: none"> <li>• Special needs education policy needs to be put in place for guidance on handling of special learners.</li> <li>• There is need to capacity built for them to be able to identify the special needs early.</li> </ul>

### Challenges, Lessons learnt and recommendations experienced during Implementation of the previous ADP

This section provides information on the challenges experienced, outlines key lessons learnt from the implementation of the previous plan and proposed recommendations for improvement. These include:

Challenges	Lessons learnt	Recommendations
Inadequate budgetary allocation.	Embracing alternative financing such as Public Private Partnership in development can reduce the financing gap.	<ul style="list-style-type: none"> <li>The Department should increase its sources of revenue to avoid over reliance on exchequer releases.</li> <li>Alternative financing from development partners e.g. PPP among others should be embraced.</li> </ul>

Untimely release of funds: This hindered timely implementation of planned activities.	Untimely release of exchequer delays implementation of projects.	Fast track correspondences with the office of controller of budget and other funding agencies to ensure timely release of funds.
Inadequate technical staff to provide effective technical and supervisory services for public service delivery,	Human resource facilitates efficient delivery of services	Employ more technical staff to facilitate departmental roles
Limited funding towards education sector development programmes;	Under funding of education sector programmes affects achievement of education goals	The county departments should come up with enhanced revenue collection strategies to ensure there is no budget deficit;
-	strengthened relationship between the County Executive and County Assembly in order to foster harmony and smooth working relationship throughout the financial year.	Bonding sessions at least on quarterly basis between the leadership of the two arms of County government in order to address emerging issue that may derail smooth working relations.

### 2.2.7 Recreation, Culture, Youth and Sports

For the FY 2022/23, the total expenditure for the Department of Gender, Culture, Youth and Sports amounted to Ksh. 141,556,681.45 for recurrent and Ksh. 138,070,388.55 for development. The revised budget was Ksh. 351,180,661 making the absorption rate 79.6%.

### Analysis of Capital projects of the Previous ADP

Provide a brief summary of what was achieved during the previous ADP. Details of the achievements should be provided as indicated in Annex 1 and 2.

The department of Gender, Culture, Youth and Sports undertook the following projects; the modernization of Masinde Muliro Stadium in Kanduyi Sub County. Within the financial year, the construction of the main pavillion continued and is now at 80% complete. The pavillion will have a five thousand sitting capacity, offices and a dais that can accommodate performances.

Also, Sangalo Cultural centre multi-purpose hall construction is ongoing and the construction of hostels at the High Altitude Training Centre in Kapsokwony is complete. The administration block at the high altitude center was also equipped and the centre is about to be operationalized.

### Payments of Grants, Benefits and Subsidies

This section should provide information on total payments done by the county government.

### **Challenges, Lessons learnt and recommendations experienced during Implementation of the previous ADP**

This section provides information on the challenges experienced, outlines key lessons learnt from the implementation of the previous plan and proposed recommendations for improvement. These include:

<b>Challenges</b>	<b>Lessons learnt</b>	<b>Recommendations</b>
A number of programmes could not be implemented because there were no policies in place to support them but this is about to be remedied as the seven policies by the department are complete and are awaiting to go to cabinet.	Legal framework is necessary for project implementation	Proper legal framework should be put in place before budgetary allocation to projects
Late disbursement of funds and inadequacy which left a lot of programs not done by the end of the financial year.	Resource mobilization is key in bridging the resource gap	Embrace resource mobilization to raise more funds to enable project implementation.

### Challenges, Lessons learnt and recommendations experienced during Implementation of the previous ADP

This section provides information on the challenges experienced, outlines key lessons learnt from the implementation of the previous plan and proposed recommendations for improvement. These include:

Challenges	Lessons learnt	Recommendations
Inadequate budgetary allocation to the implementing department of Tourism, Water and Natural Resources. This has led to zero project implementation in the Department of Tourism and Natural Resources.	Resource mobilization is key in addressing resource gaps	The implementing departments should seek alternative financing from development partners e.g. PPP to enable them meet their development targets
Inadequate project identification strategy leading to low impact projects being implemented.	Pre-implementation project reviews and cost benefit analysis increases benefits accruing from opportunity costs	For effective and sustainable projects there is need for proper prefeasibility studied to be carried out to inform implementation
Inadequate technical capacity in the Climate Change, Tourism, Environment, Water and Natural Resources Departments.	Non replaced retirements has caused Human Technical capacity crisis in the department.	The County Human Resource department should carry out succession management effectively across county departments.
Delayed disbursement of FflooCa CCIS grants leading to delayed implementation of FflooCa work plan.	Untimely release of funds delays implementation of projects.	Development parts are urged to honour MOUs timely

### 2.3. Development Issues

This section presents key sector development issues and their causes. The information is provided as indicated in table 16.

## **CHAPTER THREE: COUNTY STRATEGIC PRIORITIES, PROGRAMMES AND PROJECTS**

This chapter presents sector/sub-sector strategic priorities, programmes and projects for the Financial Year 2024/25 as indicated in the CIDP.

### **3.1 Sector overview**

#### **3.1.1 Agriculture, Urban and Rural Development**

##### **Sector Vision**

An Innovative, sustainable and commercially oriented sector.

##### **Sector Mission**

To facilitate competitive agriculture, land management and urban development through; enhanced institution efficiency, capacity building, optimal and sustainable resource management, promotion of value addition, and marketing systems.

##### **Sector Goal**

A food secure and wealthy County with sustainable management and utilization of land and the blue economy.

##### **Sector Objectives**

- To enhance crop production, productivity, value addition, marketing and incomes
- To promote adoption of irrigation technologies for enhanced agricultural productivity
- To enhance livestock production, productivity, value addition and incomes
- To enhance fisheries production, productivity, value addition and incomes
- Improved Access, Tenure and Land Management
- Promote sustainable urban development

##### **Sector Development Objectives and Strategies**

This section presents the sector objectives and strategies in relation to development issues identified in the previous chapter. The information is captured as provided in the Table 31.

**Table 31: Sector Development issues, objectives, and strategies**

#### 4.3. Risk Management

This section provides the key anticipated risks that may hinder the implementation of the CADP and proposed mitigation measures as shown in table 60.

Table 63: Risk Management

Risk Category	Risk	Risk Implication	Risk level (Low, Medium, High)	Mitigation measures
Financial	Limited financial resource	Scaled down, delayed or non-implementation of projects	High	Mobilization for more resources
	Volatile economic environment	Delayed implementation/utilization of projects	High	Prioritize projects according to community needs
		Low investment levels		Develop measures to cushion citizenry.
	Supplier risk	Failure/Faulty/inadequate supplies	Moderate	Supplier sensitization/empowerment. Enforcement of legal framework
	Grants delay/failure risk	Slow /stalled implementation of projects	High	Enhancing compliance to MOUs/agreements
	Fraud	Loss of resources	Moderate	Enhanced internal control mechanisms.
Technological	Rapid technological changes	Outdated systems	High	Keep updating systems to move with the times.
	Cyber attack	Loss of information	High	Enhance data security.
Climate Change	Natural disasters such as floods, droughts, fires, Landslides, Thunderstorms and Lightning among others.	Slow project implementation.	Moderate	Enhance emergency support. Developing early warning systems, capacity development of the actors/vulnerable, and insurance of enterprises
		Destruction of infrastructure resources. Displacement of human settlements.		
	Pests and diseases	Reduced production/productivity Loss of crops and livestock.	High	Developing early warning systems, farmer capacity development for pest and disease management, facilitating insurance of the enterprises
	Increased weather variability	Slow project implementation. Environmental degradation Reduced production/productivity Loss of crops and livestock.	High	Promotion of Climate Smart Agriculture (CSA) and Green Growth (GG) technologies. Developing early warning systems, insurance of the enterprises
Organizational	Attrition of human resource	Loss of specialized knowledge	High	Continuous capacity building. Keeping government workers happy and motivated by; Use of modern technology; offer remote/hybrid job roles; highlight good work and provide feedback
	Workplace	Loss of human	Moderate	Enhance security measures.

	security (theft, terrorist attacks, degraded infrastructure)	resource/assets		
	Workplace injuries and infections	Low productivity	High	Provide protective gears to workers
	Liabilities arising from service provision	Loss of value for money	Low	Enforcement of professionalism Operationalise Risk fund
	Drugs and substances abuse	Low productivity	High	Enhance guidance, counselling and mentorship programs

DRAFT

## CHAPTER FIVE: MONITORING, EVALUATION AND REPORTING

This chapter should discuss the county monitoring and evaluation framework as outlined in the County Integrated Monitoring and Evaluation System (CIMES).

### 5.1. Introduction

The section provides a brief description of the M&E structure in the county. This will include the existence of M&E policy and its operationalization, M&E committees established, M&E unit, its staff establishment and where it is domiciled.

#### County Monitoring and Evaluation Structure

This section summarizes established systems and structures in the county to organize the M&E process for implementing the plan. This includes the institutional arrangement of the M&E function (Directorate/Unit), various committees and coordination of M&E activities i.e., departmental focal persons, champions and stakeholder engagement fora as stipulated in the CIMES guidelines.

#### Capacity Development

The officers charged with overseeing M&E activities at all levels are equipped with skills and capacities to perform their roles effectively. To embrace automation for real time reporting, training on ICT platforms (e-CIMES, ODK, amongst others) was done to support data collection, uploading, downloading and data analysis for continuous updating of databases and use of M&E information by all stakeholders. The directorate responsible for M&E in collaboration with stakeholders shall develop a Capacity Development Strategy to guide M&E capacity development in the County.

#### Financing Arrangements

Effective implementation of the M&E function requires provision of adequate financial resources. The budget will cover staffing, external technical support, capacity building; capital expenses and operational expenses. The National M&E Policy requires Ministries, Departments, Agencies and Counties (MDACs) to have a separate budget component for M&E with adequate resources. In addition, all development programmes/projects will provide budgets earmarked for monitoring and evaluation. The Directorate responsible for M&E in the County in collaboration with stakeholders will develop a Resources Mobilization Strategy to enhance the capability to undertake M&E function.

### 5.2. Performance Indicators

DRAFT

### 5.3. Data collection, Analysis and Reporting mechanisms

This section provides the main methods and tools that will be used for data collection, archiving, analysis and reporting arrangements in line with the National M&E Norms and Standards. This includes development of standard reporting templates based on the County Annual Progress Reports Guidelines. The County Government will also state how they integrate technology in M&E through the use of e-CIMES. The section also provides the types of M&E reports to be prepared and the frequency of reporting.

The ADP monitoring strategy includes a clear data collection and analysis plan, detailing the following: units of analysis (for example, county, sub-county, village, department and section); sampling procedures; data collection instruments to be used: frequency of data collection; expected methods of data analysis and interpretation; those responsible for collecting the data; data collection partners, if any; those responsible for analyzing, interpreting and reporting data; for whom the information is needed; dissemination procedures; and follow up on findings. The system will provide an integrated platform for generating and sharing M&E data without duplication.

#### Monitoring & Evaluation Tools

##### i. M&E plan:

All projects and programmes shall include an M&E plan prior to approval. Minimum requirements for Monitoring and Evaluation plan shall include SMART indicators for implementation and results; Baseline data for the project or programme indicators; and identified reviews and evaluations to be undertaken.

County departments are accountable for establishing M&E plans for their individual departments, and also for the M&E results structure, which links all programmes/ projects of the department to the expected outcomes. This is the basis for performance monitoring and reporting, to ensure adherence to the CIMES guidelines and the Kenya National M&E Policy

##### ii. Results Based M&E Framework:

Effective monitoring and evaluation is based on a clear, logical pathway of results, in which results at one level lead to results at the next level. Results from 'one level flow towards the next level, leading to the achievement of the overall goal. If there are gaps in the logic, the pathway will not flow towards the required results. The major levels that the plan focuses on are: Inputs; Outputs, including processes; Outcomes and Impacts.

##### iii. Data Sources and Collection Method

The plan has highlighted data collection activities that will involve desktop data collation through participatory social activities from various media platforms, field surveys, daily observations and measurement sheets by project supervisors. Key data sources will include relevant institutions for administrative data, surveys and data documented by established government statistics agencies including KNBS and county statistics unit.

**Table 64: Commonly Used Data Collection Methods**

<b>Recording Data Through Administrative Actions</b>	<b>Recording data through administrative actions is primarily a method of quantitative data collection.</b>
<b>Electronic Data Harvesting</b>	<i>Electronic data harvesting</i> encompasses data collection of electronically generated data. Electronic data harvesting is a method of quantitative data collection.

<p><b>Survey</b></p>	<p>A <i>survey</i> comprises a structured series of questions that respondents are asked according to a standard protocol.</p> <p>Surveys are primarily a method of quantitative data collection, though survey questions can be either quantitative or qualitative in nature, and can measure coverage (i.e., who received an intervention), satisfaction, perceptions, knowledge, attitudes, and reported actions or behaviors.</p>
<p><b>In-depth Interview (IDI)</b></p>	<p>An <i>in-depth interview</i> is usually conducted one-on-one by an interviewer who asks an interviewee about their knowledge, experiences, feelings, perceptions, and preferences on a certain topic. IDIs can also be conducted with a group though this may not always be appropriate or optimal. The interviewer relies on a structured, semi-structured, or unstructured question guide or list of themes/points to be discussed and often encourages a free flow of ideas and information from the interviewee.</p> <p>A <i>Key Informant Interview (KII)</i> is a type of IDI, whereby an interviewee is selected for their first-hand knowledge of the topic of interest or geographical setting (e.g., community).</p> <p>IDIs are a method of qualitative data collection.</p>
<p><b>Focus Group Discussion (FGD)</b></p>	<p>A <i>focus group discussion</i> involves a skilled moderator who stimulates discussion among a group of individuals to elicit experiences, feelings, perceptions, and preferences about a topic. The moderator uses a list of topics to be discussed, ensures all voices are represented, and keeps the discussion on track. Typically, groups comprise 6-12 purposively selected participants; however, size and selection techniques may vary. Focus groups differ from group interviews in format, how they are facilitated, who may be chosen to participate, and the types of data that come out of the process.</p> <p>FGDs are a method of qualitative data collection.</p>
<p><b>Observation</b></p>	<p>Direct observation entails a trained (human) observer who records data based on what they see, hear, or touch, often based on a guided protocol. Examples include observation of skills-based performance and observations of a physical environment or setting of an intervention.</p> <p><i>Participant observation</i> involves a researcher participating in an activity and making observations informed by their experience interacting with others during the activity.</p> <p><i>Remote observation</i> or <i>remote sensing</i> entails gathering observational data through observation at a distance with the assistance of technology (e.g., satellite or aircraft-based imagery). Remote data collection is particularly useful in non-permissive environments.</p> <p><i>Observation</i> is more often used as a method of qualitative data collection but can also be used for quantitative data collection, especially when focused on the number of occurrences of a specific item, event or action.</p>

#### iv. Reporting Structures

M&E reporting is essential because it is used to: (a) determine the extent to which the CIDP and other county plans are on track and to make corrections accordingly; (b) make informed decisions regarding operations, management and service delivery; (c) ensure the most effective and efficient use of resources; (d) evaluate the extent to which the programme/project is having or has had the desired impact; and (e) whether new information has emerged that requires a strengthening and/or modification to the project management plan.

Standard reporting templates will be used to collect data and other information that will be used in compiling M&E progress reports. Tracking of progress and reporting of results will focus on inputs, processes, outputs, outcomes, and impacts of development initiatives in the County.

Performance reports will be prepared in these categories:

- Monthly reports by implementing agencies
- Quarterly reports by implementing agencies
- Annual progress reports
- Field visits and observations of programme activities and projects
- End of programme/project reports by the implementing agencies and County Monitoring and Evaluation Unit.
- Mid -Term Evaluation (Review).
- End -Term Evaluation (Review)

The table 65 presents some of the reports to be prepared.

**Table 65: Monitoring and Evaluation Reports**

Most of the existing M&E information is compiled manually hence the need to explore the possibilities of computerizing the existing manual systems for M&E operations. The e-CIMES will facilitate computerization of M&E data which will address issues of cooperative partnership in M&E information activities, systems compatibility and sustainability.

The respective departments, the county Intergovernmental Forum, and CoMEC should review these progress reports as a basis for decision making and for agreeing on action plans for development. To facilitate a smooth decision-making process, all agendas of relevant county meetings should include a review of indicators and sector progress reports as a standing item, with full reporting documents sent in advance to the participants. Where possible, progress reports should be available in an electronic format, and should combine data and associated narrative commentary and evidence

#### **5.4. Institutional framework**

This section explains in detail the institutional framework adopted to monitor the programmes e.g. the CIMES committees in place to undertake Monitoring and Evaluation of programmes and projects.

## Responsibilities and Functions of Stakeholders in the Institutional Framework

The Responsibility and functions of the different stakeholders with relevance for M&E at county level are outlined in Table 62. Governance, monitoring and reporting of the CIDP implementation progress are prescribed in section 54 of County Government Act (2012), including committee structures, roles, responsibilities and memberships. Performance Management joins up all aspects of county operations and development within a single, integrated strategic process. The performance management framework connects activities from the M&E Results Matrix in CIDP III, MTP IV and Vision 2030, to the Performance Contracts of individual senior management staff members, and to the operation of service delivery and the implementation of projects and programmes in the county. The M&E system should generate reports to be shared between the project manager and the M & E director, who approves the project M&E information, the Performance Management System (PMS) Unit, and the governors' and county commissioners' offices, which uses the information. To support the Performance Management and M&E processes of the county, the CIMES organogram is presented in Figure 11.

**Table 67: Responsibilities of Stakeholders in M&E Reporting**

Stakeholder	Responsibilities

DRAFT

## 5.5. Dissemination and feedback mechanism

This section highlights how the County Government will disseminate, get feedback, and engage citizens in M&E process as well as learning. Specific means of communicating M&E information based on unique needs of various stakeholders will be identified. The section also presents how M&E reports produced will be used for evidence based decision making.

### Dissemination of M&E Reports

The Constitution of Kenya requires that M&E Reports must be available to the public, and should be shared with county citizens and other stakeholders. Disseminating M&E results is also necessary: (i) to improve programme/project interventions; (ii) to strengthen projects/programmes institutionally; (iii) to advocate for additional resources; (iv) to create citizen awareness and ownership, and promote “people-friendly” policies; (v) to ensure that county development activities are captured in CIMES and NIMES; and (vi) to contribute to the county and national understanding of what works.

Channels for disseminating M&E Reports and information will include:

- Written reports
- Oral presentation
- Press releases
- Fact sheets
- Social and new media platforms
- Performance Dashboards
- Open Data Portals
- Adhoc analyses (comparison and benchmarking)
- E-mail, text messages and mobile notification messages
- County websites

The reports shall be utilized to inform policy actions, planning and budgeting. These reports shall be widely disseminated to key stakeholders including legislators, policy makers, research institutions, development partners and members of the public for their use.

### Feedback Mechanisms and Citizen’s Engagement

Public participation is a legal responsibility in implementation of the CIDP. In the spirit of the Constitution, citizen participation is about engaging, understanding and meeting the needs of people in the county by mobilizing all the insight, energy and commitment of individuals and groups. Participation allows the county to understand what is needed and to gain commitment to a way forward. Participation will include dissemination and gathering feedback as part of a holistic development process.

The County Executive will mobilize more innovation, opportunity, commitment and resources through community participation in development planning. Participation in development, monitoring, review and evaluation of the CIDP will strengthen county citizen awareness and ownership of the CIDP programmes/ projects that will be implemented by the county government. It will also provide a check formula to ensure value for money, accountable spending and good governance.

Participation will be used to:

- Capture the ideas, attitude, voice and commitment of stakeholders;
- Ensure and provide evidence that the county executive has met the legal duty of participatory development;
- Strengthen accountability and good governance
